Synology NAS Instructions

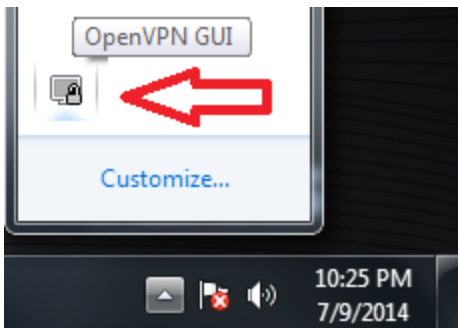

Updating the OpenVPN Port

Updating the OpenVPN Port on a Windows Computer

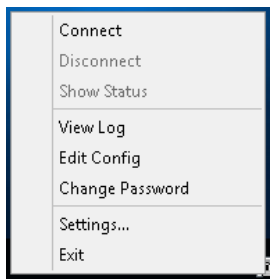

1. **Double click on the OpenVPN GUI icon (should be on the desktop)**

2. **Down at the Task Bar, right-click on the little gray OpenVPN icon**

3. **Click “Edit Config”**

4. **In the first few lines, you should see something that begins with “remote”, followed by your IP address, followed by the current Port Number.**
 - Change the Port Number appropriately, then save the file by clicking “File → Save” and exit the file

Finished!
